Election/Restrictions

Applicant's election of the compound 86 on pages 96-97 in the reply filed on 07/17/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The elected compound was not found in the search and is allowable. The search has been expanded to embrace the core

Compounds embraced by this core are under consideration. The search did not extend to compounds wherein Sc is as defined in claims 8 and 9 because these biomolecules require separate searches. Should Applicants maintain these groups, a restriction requirement will be made to elect a specific Sc group.

Claims 28-38 (along with subject matter not falling under the above core) are withdrawn from consideration because they are drawn to compositions, methods and kits that raise different issues of patentability and require separate searches.

Claim Rejections - 35 USC § 112

Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1624

i) The group R_X is defined as “a reactive group.” This is indefinite because a “reactive group” depends on the reaction condition and changes definition depending on where it is used.

Applicants are requested to insert the actual groups intended. The groups at claims 6 and 7 need to be presented as radicals and not as classes of compounds.

ii) The group S_C is defined as a “conjugated substance.” One skilled in the art cannot say what the metes and bounds of this group are.

iii) The group DYE is defined as “a reporter molecule.” This is manifestly indefinite because one skilled in the art cannot say what this is. First, a molecule does not have an open valency to bond as a radical to the rest of the macrocycle. Secondly, it is not known what is and is not a reporter molecule. The compounds at claim 10 cannot be radicals because they do not have a point of attachment. Appropriate correction is required.
